

## Experts at your service

The CEESAN is a recognised centre of excellence in evaluation and public health expertise.

The multidisciplinary team puts its experience and know-how at the service of decision-makers and professionals in the field of public health.

Many public and private institutions and organisations - working at the communal, cantonal and federal level or internationally - regularly rely on the CEESAN.

---

# Achieving collaboration

On behalf of the public health authorities (SSP) of the State of Vaud, the CEESAN developed a secure Internet platform to improve the monitoring of substitution treatment for heroin users in the State of Vaud. In operation since November 2014, this tool allows for fast and reliable data management leading to benefits for both the patient and doctor. It facilitates compliance with legal requirements regarding illegal drugs and accelerates the collection and analysis of epidemiological data.

## → CEESAN

CEESAN is a unit of the University Institute of Social and Preventive Medicine (IUMSP), with institutional links to both the Lausanne University Hospital (CHUV) and the Faculty of Biology and Medicine of the University of Lausanne (UNIL). Founded in 1970, the IUMSP enjoys an international reputation in research, education and public health expertise.
