## How does ageing affect health financing (and what to do about it)?

### INTERVENANT :

- Jonathan CYCLUS, Head of the London Hub of the European Observatory on Health Systems and Policies

### DESCRIPTIF :

While longer lives are a major achievement, they also raise several policy concerns related to health financing. To better understand the implications of population ageing for health financing and as an entry point to support countries in developing effective policy responses, the European Observatory on Health Systems and Policies along with the WHO Kobe Centre developed a simple macro simulation tool: the Population Ageing financial Sustainability gap for Health systems (PASH) Simulator. In this seminar we will make use of the PASH simulator to explore the potential effects of population ageing for health financing and consider policy options.
