BEYOND THE ABSENCE OF DISEASE: AGEING, HEALTH AND FUNCTIONING

SPEAKER

- John Beard, MBBS PhD, is Irene Diamond Professor and Director of the International Longevity Center- USA at Columbia University, New York.

SUMMARY

Health systems, and most researchers, continue to frame health from the perspective of the presence or absence of disease. Recent advances in the field of geroscience, policy initiatives from the World Health Organization, and developments in the field of AI are suggesting that a more holistic approach might be possible. Prof Beard will explore these shifts and outline his recent work in this area to instead define health from a functional perspective.

Recommandé par la Société Suisse des Spécialistes en prévention et santé publique (SPHD) pour la reconnaissance de la formation continue.
